Public Health Service Publication No. 1116
Printed February 1964

Government Printing Office - Washington: 1964

FOREWORD

The interstate carrier water supplies listed herein, which currently number 766, serve some 2,000,000 persons who travel daily from State to State on airplanes, buses, railway cars, and vessels. In addition, they are the source of water for 76,000,000 persons residing in the communities from which water is taken and placed aboard the conveyances. Thus, about 57% of the total United States population provided with public water supply, utilize systems which are certified by the Surgeon General as meeting the Public Health Service Drinking Water Standards.

The last inventory of interstate carrier water supplies was issued in 1960. Since that time the status of some supplies has changed and other supplies have been added or deleted. This inventory is published for use of State Health Department engineers, municipal authorities and Public Health Service personnel who are concerned with the annual certification of the supplies and discussions which arise therefrom.

Supplies are listed with regard to approval under STATUS OF SUPPLY as "A", "P", or "NCR." "A" signifies that the supply is fully approved as meeting the Public Health Service Drinking Water Standards. "P" indicates that for some reason, agreed upon by the State and Public Health Service engineers involved, the supply is provisionally approved pending correction of certain defects. Provisional approvals are issued with definite dates by which deficiencies are to be corrected. "NCR" stands for no current report. Under WATER POINTS SERVED, the "A", "R", and "V", stand for air, rail and vessel respectively, In some Regions some supplies also provide water to buses. Entries of dates under DATE OF LAST JOINT SURVEY, signify the dates by day and/or month of the last recorded survey of the supply from June 1, 1960 to November 1, 1963, conducted jointly by State Health Department and Public Health Service engineers.

The Interstate Carrier Water Supply Program is under the direction of the Water Supply Section of this Branch.
